

Prepared by the U. S. Army Topographic Command (AJEE), Washington, D. C. Compiled in 1954 by photogrammetric methods and from aerial photographs taken 1952-53. Photographs field annotated 1953. Revised in 1975 by the U. S. Geological Survey from aerial photographs taken 1974.

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram

LEGEND

Figures in red denote approximate distances in miles between stars

POPULATED PLACES

Over 500,000
100,000 to 500,000
25,000 to 100,000
5,000 to 25,000
1,000 to 5,000
Less than 1,000

ROADS

Primary, all-weather, hard surface
Secondary, all-weather, hard surface
Light-duty, all-weather, hard or improved surface
Fair or dry weather, unimproved surface
Trail
Interchange

RAILROADS

Standard gauge
Narrow gauge
Boundedaries
International
State
County/Parish
Park or reservation

Other Features

Landmark: School, Church, Other
Spot elevation in feet
Marsh or swampland
Intermittent or dry stream
Power line

GRID ZONE DESIGNATION

15R

TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METRES

1. Read letters identifying 100,000 metre square in which the point lies. Look for letter in the top or bottom right corner of the 100,000 metre square. If the point is on the line itself, estimate north from grid line to point. Look for letter in the top or bottom right corner of the 100,000 metre square. If the point is on the line itself, estimate north from grid line to point.
