GEOLOGICAL SURVEY

1993

Produced by the United States Geological Survey
U.S. portion compiled from USGS 1:24 000-scale topographic maps dated 1982-1984. Planimetry revised from aerial photography taken 1984-1985 and other source data. Revised information not field checked.
Mexico portion derived from DGG 1:50 000-scale topographic maps dated 1977, 1978 and 1979. Altitude H14C74, Guerrero H14C75, San Monica H14C85 and El Anole H14C86. Map edited 1993.
1927 North American Datum (NAD 27). Projection and 10 000-meter-grid. Universal Transverse Mercator, zone 14. 25 000-foot ticks. Texas coordinate system, south central and south zones.
The difference between NAD 27 and North American Datum of 1983 (NAD 83) is too small to show at this scale. The values of the shift between the datums for 7.5-minute intersections are given in USGS Bulletin 1875. Mexico portion is NAD 27.
There may be private inholdings within the boundaries of the National or State reservations in the U.S. portion shown on this map.
