

Prepared by the Defense Mapping Agency Topographic Center, Washington, D. C. Compiled in 1955 by photogrammetric methods and from USGS quadrangles 1:24,000, 1:31,000, and 1:62,500-scale, dated 1903-1953. Photographs field annotated 1953. Revised by the U. S. Geological Survey from aerial photographs taken 1973, 1975, 1976 and other source data. Revised information not field checked. Map edited 1978.

Area covered by dashed light-blue pattern is subject to controlled inundation 100,000-foot grids based on Colorado coordinate system, central and north zones.

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram.

There may be private inholdings within the boundaries of Federal or State reservations shown on this map.

LEGEND

POPULATED PLACES

Over 500,000 **LOS ANGELES**

100,000 to 500,000 **OMAHA**

25,000 to 100,000 **GALVESTON**

5,000 to 25,000 **Durango**

1,000 to 5,000 **Grand Coulee**

Less than 1,000 **Sun Valley**

TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METERS

SAMPLE POINT NAME

1. Read letters describing 100,000 meter square in which the point lies.

2. Locate first VERTICAL grid line to LEFT of point and read LARGE figure labeling the line either in the top or bottom margin or on the line itself.

3. Estimate tenths from grid line to point.

4. Locate first HORIZONTAL grid line BELOW point and read LARGE figure labeling the line either in the left or right margin or on the line itself.

5. Estimate tenths from grid line to point.

SAMPLE REFERENCE

If reporting beyond 15° in any direction, prefix Grid Zone Designation as: 18N0720
