

PRODUCED BY THE U. S. GEOLOGICAL SURVEY

Base map prepared by Defense Mapping Agency by photogrammetric methods and from 1:62,500 and 1:125,000 scale maps dated 1932-1954. Field checked 1956. Revised by the U. S. Geological Survey from aerial photographs taken 1978 and other source data. Revised information not field checked. Map edited 1981.

Transverse Mercator Projection, 10,000-meter Universal Transverse Mercator grid, zone 11. 100,000-foot grid ticks based on Montana coordinate system, central and north zones, and Idaho coordinate system, west zone, 1927 North American Datum. To place on the predicted North American Datum 1983, move the projection lines 13 meters north and 73 meters east.

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram.

There may be private inholdings within the boundaries of the National or State Reservations shown on this map.

POPULATED PLACES

Over 500,000

100,000 to 500,000

25,000 to 100,000

5,000 to 25,000

1,000 to 5,000

Less than 1,000

GRID ZONE DESIGNATION

TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METERS

1. Read letters identifying 100,000 meter square in which the point lies

2. Locate first vertical, and line to left of point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself

3. Locate first HORIZONTAL grid line to the left of the point and read LARGE figure labeling the line either in the left or right margin, or on the line itself

4. Estimate tenths from grid line to point

5. Estimate tenths from grid line to point

6. Estimate tenths from grid line to point

7. Estimate tenths from grid line to point

8. Estimate tenths from grid line to point

9. Estimate tenths from grid line to point
