To convert feet to meters
multiply by 3.048

To convert meters to feet
multiply by 3.2808

1. Dryland
2. Wetlands (May be partially submerged at mean high tide)
3. Exposed at mean low tide

Mapped, edited, and published by the Geological Survey and the National Ocean Survey
Control by USGS and NOS/NOAA

Orthophotomap prepared by the Geological Survey from aerial photograph taken April 19, 1974. Topography by planimetric surveys 1958; revised from aerial photographs taken 1974. Field checked 1975. Map edited 1975. Supersedes topographic map dated 1958.

Bathymetry compiled by the National Ocean Survey from tide-coordinated hydrographic surveys. Soundings compiled from NOS 11504. This information not intended for navigational purposes.

Mean low water (dotted) line and mean high water (solid) line compiled by NOS from tide-coordinated aerial photographs. Apparent shoreline (outer edge of vegetation) shown by photomicroscopy.

Projection and 10,000-foot grid ticks: Georgia coordinate system, east zone (transverse Mercator). 1000-meter Universal Transverse Mercator grid, zone 17 1927 North American datum. To place on the predicted North American Datum 1983 move the projection lines 20 meters south and 17 meters west as shown by dashed corner ticks.

There may be private inholdings within the boundaries of the National and State reservations shown on this map.

HYDROGRAPHIC SURVEY INFORMATION

Survey Number	Survey Date	Survey Scale	Survey Line Spacing (Naut. Miles)
H-4444	1924	1:20,000	05-35
H-5698	1934-35	1:10,000	01-10
