

MAPPED, EDITED, AND PUBLISHED BY THE U. S. GEOLOGICAL SURVEY AND THE NATIONAL OCEAN SURVEY

Original topographic map prepared by the Defense Mapping Agency Topographic Center from 1:24,000 and 1:50,000-scale maps dated 1913-1956; NOS charts dated 1936-1955; and aerial photographs taken 1951-1955. Field checked 1957. Bathymetry compiled from NOS Hydrographic Surveys (see index) which comply with International Hydrographic Organization (IHO) Special Publication 44 accuracy standards and/or standards used as of the date of the surveys. Shoreline (mean high water line) from NOS nautical charts which are compiled from tide-coordinated aerial photographs. This information is not intended for navigational purposes.

Offshore protection data, printed in red, compiled by the Bureau of Land Management. Heavy lines indicate limits of BLM Outer Continental Shelf Official Protection Diagrams. The protections on this map are not for Federal leasing purposes; for such purposes, refer to the OCS Official Protection Diagrams available from the Bureau of Land Management.

100,000-foot grids based on South Carolina coordinate system, south zone, and Georgia coordinate system, east zone.

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram.

Portion of Georgia-South Carolina boundary in dispute, not shown.

GRID ZONE DESIGNATION	TO GIVE A STANDARD REFERENCE ON THIS MAP TO NEAREST METERS
17S	17S
MG	NG

USING THE SMALLER Figure of any grid number, these are for finding the full coordinates; the ONLY the LARGER Figure of the grid number: Example: 17S0000

TO GIVE A STANDARD REFERENCE ON THIS MAP TO NEAREST METERS

1 Read letters, identifying 100,000 meter square in which point lies.

2 Locate first VERTICAL, and then to LEFT of point, read LARGE figure labeling the line which is the left or right margin, or as the case may be.

3 Locate first HORIZONTAL, and then to RIGHT of point, read LARGE figure labeling the line which is the left or right margin, or as the case may be.

4 Estimate meters from grid line to point.
