Diagram illustrating the difference between True North and Magnetic North. True North is a vertical line. Magnetic North is a line pointing 16 degrees east of True North. The angle between them is labeled 16°.

A graphic scale bar is provided for reference. It is labeled "SCALE 1:24,000" at the top. The bar has two scales: the top scale is in miles, with markings for 1/2 and 1 mile; the bottom scale is in feet, with markings from 0 to 7000 in increments of 1000.
