TO GIVE A STANDARD REFERENCE TO THIS SHEET TO NEAREST 100 METERS

1. Read letters identifying 100,000 meter square in which the point lies.
2. Locate the vertical grid line to LEFT of point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself.
3. Locate the horizontal grid line to point. Estimate tenths from grid line to point. Estimate tenths from grid line to point. Estimate tenths from grid line to point.
