

Prepared under the direction of the President, Mississippi River Commission.
Horizontal control by Mississippi River Commission and Corps of Engineers,
U. S. Army, New Orleans District and Vicksburg District.
Vertical control by Mississippi River Commission and Corps of Engineers,
U. S. Army, New Orleans District and Vicksburg District.
Descriptions, elevations and geodetic positions of bench marks may be
obtained from New Orleans Engineer District, New Orleans, La.
Topography by Corps of Engineers, U. S. Army, New Orleans District
and Vicksburg District, 1930-1941.

Revised by Mississippi River Commission, 1932, 1935 and 1941.
Water edge of the Atchafalaya River is Mean Low Water and depths
shown along thalweg are below Mean Low Water and taken from
survey, September, October, 1938.

survey, September-October, 1938.
Mean Low Water elevations are expressed in feet, Mean Gulf Level, and
are shown on south and east borders.

Depths along thalweg in Red River are referred to Mean Gulf Level and taken from survey of 1938 by Vicksburg Engineer District. Elevations in Bayou Des Glaizes west of Moreauville are taken from survey, May-August, 1939. Political boundaries are shown according to best available information, and are subject to change except where established by court decision.

and are subject to change except where established by court decision. Boundary between Vicksburg and New Orleans Engineer Districts is the right bank of Red River.

Work under Flood Control Act shown as of December 1941.
Polyconic Projection, North American Datum.

Figure 1 is a horizontal scale bar. It is divided into four main sections. The top section is labeled 'Miles' and ranges from 0 to 1. The second section is labeled 'Feet' and ranges from 0 to 2000. The third section is labeled 'Yards' and ranges from 0 to 2000. The bottom section is labeled 'Kilometers' and ranges from 0 to 6. The scale is labeled 'Scale 1/62500' and 'Contour interval 5 feet'.

Datum is mean gulf level at Biloxi, Mississippi. Elevations differ from mean sea level elevations as determined by the U. S. Coast and Geodetic Survey, by small fractions of a foot. Persons interested may secure elevations of bench marks as determined by the latest U. S. C. & G. S. adjustment, by applying to the U. S. Coast and Geodetic Survey.

marks as determined by the latest U. S. C. & G. S. adjustment, by applying to the U. S. Coast and Geodetic Survey.

LOUISIANA STATE GRID ZONE 14A (NORTH) IS INDICATED BY DOTTED TICKS OUTSIDE THE NEAT LINE AT 10,000 FT. INTERVALS.
