

This is a detailed topographic map of the Black Hills National Forest and surrounding areas in South Dakota. The map features a grid system with coordinates and elevations. Key geographical features include the Black Hills National Forest, Buffalo Gap National Grassland, and Custer National Monument. Major roads and towns are labeled, and the map shows various canyons, rivers, and lakes. The terrain is depicted with contour lines and color shading to represent elevation. The map is oriented with North at the top.

The surface and minerals management status overprints are published as general planning and management tools. Some of the lands, surface and mineral rights, may have been shown as patented lands due to the lack of information available to BLM with respect to the nature of acquisition. Tracts less than 40 acres are usually omitted because of the map scale. Access through private lands may be restricted. The official land records in the respective offices of the Bureau of Land Management or other responsible Federal agencies should be checked for up-to-date status on any specific tract of land. Inadequacies in the BLM maps should be reported to the respective Bureau of Land Management offices from which the maps were obtained.
