Prepared by the U.S. Army Topographic Command (KCSX), Washington, D.C. Compiled in 1956 by photogrammetric methods and from United States quadrangles, 1:25,000, 1947-53; USC & GS charts 1246, 1955; 1247, 1954. Planimetry revised in part from aerial photographs taken 1950-51. Revised in 1972 by the U.S. Geological Survey from aerial photographs taken 1969-1972.

Selected hydrographic data compiled from USC&GS charts 1954-1955. This information is not intended for navigational purposes

100,000-foot grids based on Florida coordinate system, east and west zones

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Conrtol Diagram

LEGEND

Figures in red denote approximate distances in miles between stars

POPULATED PLACES
- Over 500,000 — BOSTON
- 100,000 to 500,000 — RICHMOND
- 25,000 to 100,000 — EVANSTON
- 5,000 to 25,000 — Hialeah
- 1,000 to 5,000 — Bar Harbor
- Less than 1,000 — Fishkill

RAILROADS — Single track, Double or Multiple
- Standard gauge
- Narrow gauge

BOUNDARIES
- International
- State
- County
- Park or reservation

Spot elevation in feet .221

- Landplane airport
- Landing area
- Seaplane airport
- Power line
- Orchard
- Woods-brushwood

ROADS
- Primary, all-weather, hard surface
- Secondary, all-weather, hard surface
- Light-duty, all-weather, hard or improved surface
- Fair or dry weather, unimproved surface
- Trail
- Interchange

Route markers: Interstate, U.S., State 95 29 193
- Landmark: School; Church; Other
- Depth curve in feet
- Limit of danger; Reef
- Rocks: Awash
- Foreshore flat; Mangrove
- Intermittent or dry stream
- Marsh or swamp

GRID ZONE DESIGNATION:
17 R
100,000 M. SQUARE IDENTIFICATION

MA NA
MV NV
300
50

IGNORE the SMALLER figures of any grid number; these are for finding the full coordinates. Use ONLY the LARGER figure of the grid number; example: 2990000

TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METRES

SAMPLE POINT: BRIGHTON

1. Read letters identifying 100,000 metre square in which the point lies: MA
2. Locate first VERTICAL grid line to LEFT of point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself: 9
   Estimate tenths from grid line to point: 1
3. Locate first HORIZONTAL grid line BELOW point and read LARGE figure labeling the line either in the left or right margin, or on the line itself: 1
   Estimate tenths from grid line to point: 1

SAMPLE REFERENCE: MA9111

If reporting beyond 18° in any direction, prefix Grid Zone Designation, as: 17RMA9111
