To convert feet to meters
multiply by .3048
To convert meters to feet
multiply by 3.2808

1. Dryland
2. Wetlands (May be partially submerged at mean high tide)
3. Exposed at mean low tide

Produced by the Geological Survey and the National Ocean Survey
Control by the USGS and NOS/NOAA
Orthophotomaps prepared from aerial photograph taken January 10, 1976. Topography by photogrammetric methods from aerial photographs taken January, 1975 and planimetric surveys 1978. Field checked 1978. Map edited 1981. Supersedes topographic map dated 1950.
Bathymetry compiled by the National Ocean Survey from tide-coordinated hydrographic surveys.
This information is not intended for navigational purposes.
Mean low water (dotted) line and mean high water (solid) line compiled by NOS from tide-coordinated aerial photographs.
Apparent shoreline (outer edge of vegetation) shown by photomicroscopy.
Projection and 10,000-foot grid ticks: Florida coordinate system, north zone (Lambert conformal conic).
1000-meter Universal Transverse Mercator grid, zone 16.
1927 North American Datum.
The difference between 1927 North American Datum and North American Datum of 1983 (NAD 83) for 7.5-minute intersections is given in USGS Bulletin 1875. The NAD 83 is shown by dashed corner ticks.
Dotted land lines established by private subdivision of the Forbes Purchase.
There may be private inholdings within the boundaries of the National or State reservations shown on this map.
