

Q701  
Edition 1-AMS (First Printing, 2-62)

Prepared by the Army Map Service (ASAM), Corps of Engineers, U. S. Army, Washington, D. C. Compiled in 1958 by photogrammetric methods. Coastal hydrography compiled from USC&GS Chart 9464, 1956. Horizontal and vertical control by USC&GS and 660th Engr Bn (Base Topo). Photography partially field annotated 1955.

CONTOUR INTERVAL 50 FEET  
WITH SUPPLEMENTARY CONTOURS AT 25 FOOT INTERVALS  
VERTICAL DATUM: APPROXIMATE MEAN SEA LEVEL  
TRANSVERSE MERCATOR PROJECTION  
HORIZONTAL DATUM: 1927 NORTH AMERICAN DATUM

HYDROGRAPHIC DATUM: SOUNDINGS IN FATHOMS REFERRED TO MEAN LOWER LOW WATER  
BLACK NUMBERED LINES INDICATE THE 1,000 METER UNIVERSAL TRANSVERSE MERCATOR GRID, ZONE 4  
BLUE NUMBERED TICKS OUTSIDE THE NETLINE INDICATE THE 1,000 METER UNIVERSAL TRANSVERSE MERCATOR GRID, ZONE 5  
THE LAST THREE DIGITS OF THE GRID NUMBERS ARE OMITTED

USERS NOTING ERRORS OR OMISSIONS ON THIS MAP ARE URGED TO MARK HEREON AND FORWARD DIRECTLY TO COMMANDING OFFICER, ARMY MAP SERVICE, WASHINGTON, D. C. MAPS SO FORWARDED WILL BE RETURNED OR REPLACED IF DESIRED.

| LEGEND                                                      |                                            |
|-------------------------------------------------------------|--------------------------------------------|
| ROAD DATA 1955                                              |                                            |
| RAILROADS                                                   |                                            |
| Hard surface, heavy duty, four or more lanes wide           | Standard gauge (4'8 1/2")                  |
| Hard surface, heavy duty, two lanes wide; Three lanes wide  | Narrow gauge (3')                          |
| Hard surface, medium duty, four or more lanes wide          | Unimproved                                 |
| Hard surface, medium duty, two lanes wide; Three lanes wide | Horizontal control point                   |
| Unimproved dirt                                             | Bench mark, monumented                     |
| Trail                                                       | Bench mark, non-monumented                 |
| BOUNDARIES                                                  | Spot elevations in feet: Checked/Unchecked |
| National                                                    | Glacier                                    |
| Reservation                                                 | Woods-brushwood; Scrub                     |
| Buildings                                                   | Tundra                                     |
| School; Church                                              | Swamp or marsh                             |
| Mines: Vertical shaft; Horizontal shaft; Open pit           | Large rapids; Large falls                  |
| Prospect                                                    | Soundings in fathoms                       |
| Distorted surface; Mine tailings                            | Foreshore flat                             |
|                                                             | Rocks: Bare or awash; Sunken               |
|                                                             | Mud                                        |
|                                                             | Limit of danger; Reef                      |

| GRID ZONE DESIGNATION: 4W                                                                                                                                   |          |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| 100,000 M. SQUARE IDENTIFICATION                                                                                                                            |          |
| EQ                                                                                                                                                          | 7900     |
| EP                                                                                                                                                          |          |
| IGNORE THE SMALLER figures of any grid number; these are for finding the full coordinates. Use ONLY the LARGER figures of the grid number; example: 7879000 |          |
| TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 100 METERS                                                                                            |          |
| SAMPLE POINT: GAS WELL NO 3 (ABANDONED)                                                                                                                     |          |
| 1. Read letters identifying 100,000 meter square in which the point lies:                                                                                   | EP       |
| 2. Locate first VERTICAL grid line to LEFT of point and read LANE figure labeling the line either in the top or bottom margin, or on the line itself:       | 87       |
| 3. Estimate tenths from grid line to point:                                                                                                                 | 4        |
| 4. Locate first HORIZONTAL grid line BELOW point and read LANE figure labeling the line either in the left or right margin, or on the line itself:          | 97       |
| 5. Estimate tenths from grid line to point:                                                                                                                 | 6        |
| SAMPLE REFERENCE:                                                                                                                                           | EP874976 |
| If reporting located 10" in any direction, prefix Grid Zone Designation, ex: 4WEP874976                                                                     |          |
