SAMPLE POINT - CANNERY

1. Read letters identifying 100,000 meter square in which point lies.

2. Locate first VERTICAL grid line to LEFT of point and read RANGE figure (labeling the letter to the left of the letter) on the line itself.

3. Estimate letters from grid line to point.

4. Locate first HORIZONTAL grid line BELOW point and read RANGE figure (labeling the letter to the left of the letter) on the line itself.
