1. Dryland
2. Wetlands (May be partially submerged at mean high tide)
3. Exposed at mean low tide

Maped, edited, and published by the Geological Survey and the National Ocean Survey, in cooperation with State of Georgia agencies

Orthophotomaps prepared by the Geological Survey from aerial photographs taken April 15, 1974. Topography by photogrammetric methods from aerial photographs taken 1974. Field checked 1975. Map edited 1978. Supersedes topographic map dated 1955. Bathymetry compiled by the National Ocean Survey from tide-coordinated hydrographic surveys. This information is not intended for navigational purposes. Mean low water (dotted) line and mean high water (solid) line compiled by NOS from tide-coordinated photography dated 1970, 1971, 1974, 1975, and State of Georgia aerial photography dated 1976. Apparent shoreline (outer edge of vegetation) shown by photomaps. Projection: South Carolina coordinate system (Lambert conformal conic). 10,000-foot grid ticks based on South Carolina coordinate system, south zone, and Georgia coordinate system, east zone 1000-meter Universal Transverse Mercator grid, zone 17 1927 North American datum. Georgia-South Carolina boundary in dispute, not shown.
