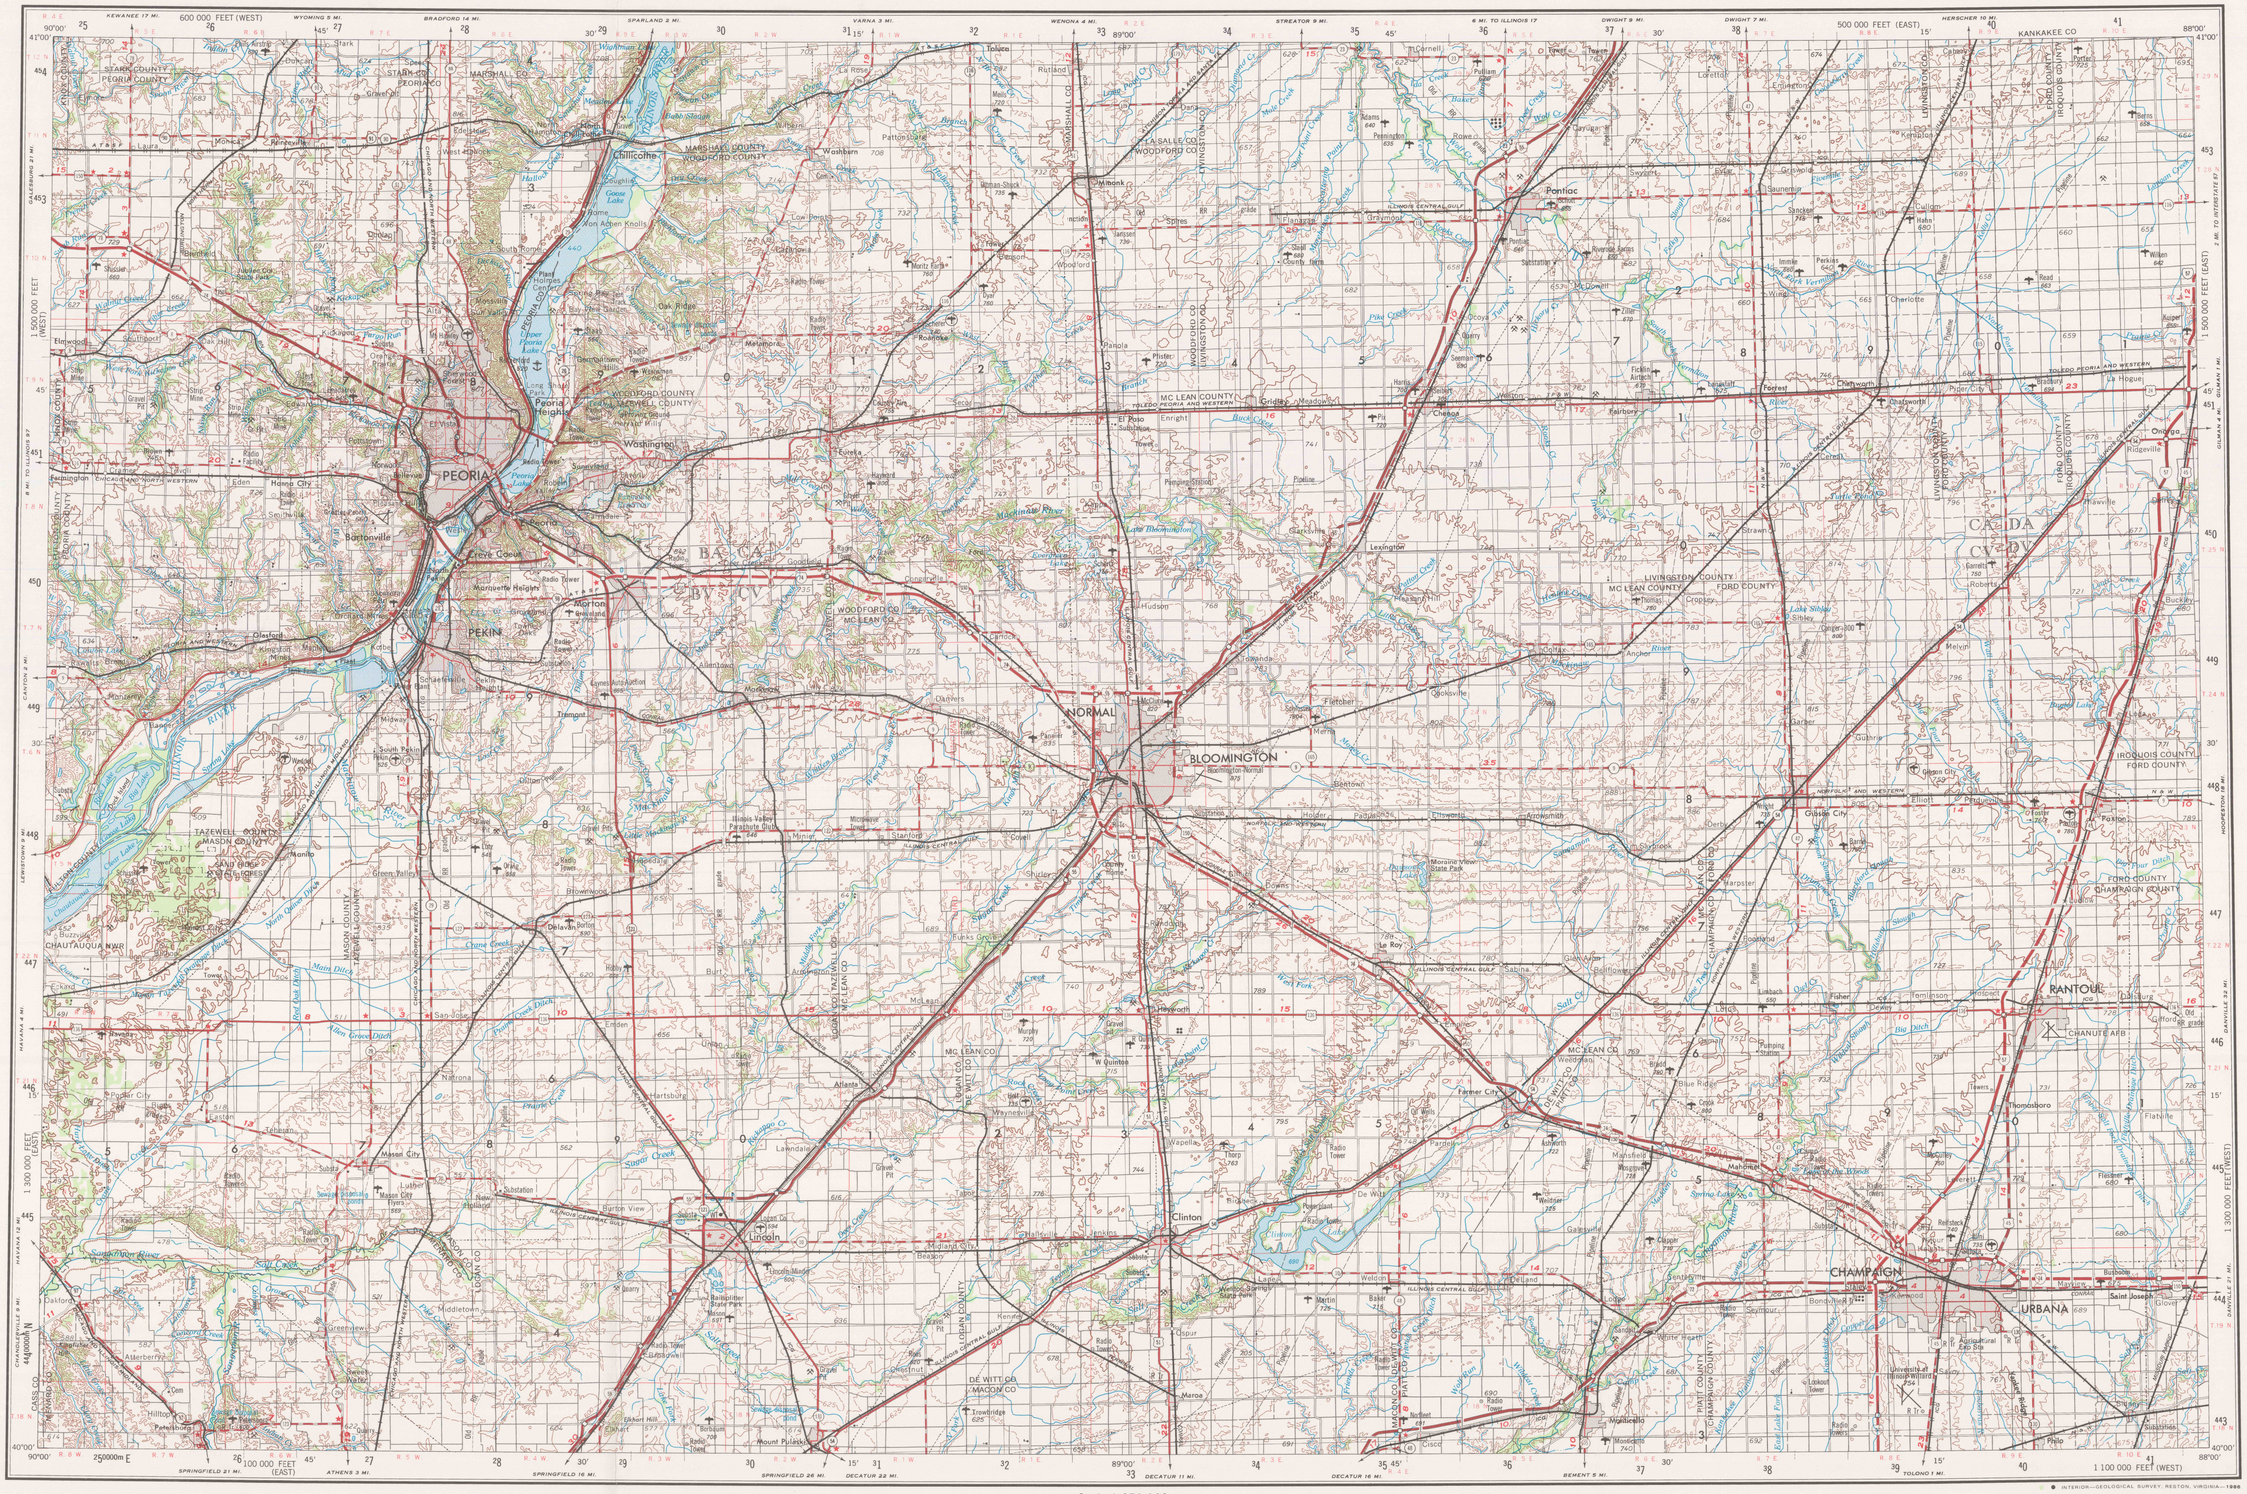
# PEORIA



PRODUCED BY THE U. S. GEOLOGICAL SURVEY

Base map prepared by Defense Mapping Agency by photogrammetric methods and from 1:25,000, 1:48,000, 1:50,000, and 1:62,500-scale maps dated 1911–1957. Field checked 1958. Revised by the U. S. Geological Survey from aerial photographs taken 1979 and other source data. Revised information not field checked. Map edited 1980

Area covered by dashed light-blue pattern is subject to controlled inundation

Area covered by light-blue hatching is to be submerged

Transverse Mercator Projection. 10,000-meter Universal Transverse Mercator grid, zone 16. 100,000-foot grid ticks based on Illinois coordinate system, east and west zones. 1927 North American Datum. To place on the predicted North American Datum 1983, move the projection lines 7 meters east

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram

There may be private inholdings within the boundaries of the National or State reservations shown on this map

LEGEND

Figures in red denote approximate distances in miles between stars

POPULATED PLACES
Over 500,000
100,000 to 500,000
25,000 to 100,000
5,000 to 25,000
1,000 to 5,000
Less than 1,000

100,000 M. SQUARE IDENTIFICATION

| | | |
|---|---|---|
| BA | CA | DA |
| BV | CV | DV |

IGNORE the SMALLER figures of any grid number; these are for finding the full coordinates. Use ONLY the LARGER figure of the grid number; example: 440000

TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METERS

SAMPLE POINT: ELLSWORTH

1. Read letters identifying 100,000 meter square in which the point lies.
2. Locate first VERTICAL grid line to LEFT of point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself.
   Estimate tenths from grid line to point.
3. Locate first HORIZONTAL grid line BELOW point and read LARGE figure labeling the line either in the left or right margin, or on the line itself.
   Estimate tenths from grid line to point:

SAMPLE REFERENCE: CV5579

If reporting beyond 18° in any direction, prefix Grid Zone Designation, as: 17TCV5579
