

Prepared by the Defense Mapping Agency Topographic Center, Washington, D. C. Compiled in 1953 by photogrammetric methods and from United States quadrangles, 1:24,000, 1953-55. Planimetry revised from aerial photographs taken 1954. Photographs field annotated 1954. Revised in 1976 by the U. S. Geological Survey from aerial photographs taken 1975. Areas covered by dashed light-blue pattern are subject to controlled inundation. 100,000-foot grids based on Colorado coordinate system, south and central zones. Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram.

10,000 M. SQUARE REFERENCE ON THIS SHEET TO NEAREST 1000 METERS

TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METERS

SAMPLE POINT: BRADDOCK

1. Read letters identifying 100,000 meter square in which the point lies.

2. Locate first VERTICAL grid line to LEFT of point and read LARGE figure labeling the line either on the top or bottom margin, or on the line itself.

3. Locate first HORIZONTAL grid line BELOW the point and read LARGE figure labeling the line either on the left or right margin, or on the line itself.

Estimate meters from grid line to point: Line either on the left or right margin, or on the line itself.

Estimate meters from grid line to point: Line either on the left or right margin, or on the line itself.

SAMPLE REFERENCE:

If reporting brevity is in any direction, give Grid Zone Designation, etc.
